Public Transportation for *Freight*

A 50 car train eliminates 200 trucks from our highways.

- ❖ 200 trucks, two abreast, would stretch for 1.3 miles.
- ❖ Round-Trip, these 200 trucks represent 400 trips.
- ❖ We love to see commuter lots full and count the cars.
- ❖ We should love to see rail yards full and count the cars.

Rail Freight – Tomorrow's highway congestion solution available now
